June 01, 2021

Sir,

88% efficiency on electrical generation which is beyond 63% of conventional combined cycle gas turbine systems at a lower capital cost than other systems on natural gas is what I heard of my patented technology. Ready to meet you at my expense !  
How might I do you good ?

- Say about my three patents which I have that I heard can give New tech for coal fired controlling particulate matter with 5-10% more fuel efficiency.
- Make a presentation about my technology
- Meet with you. You say when where I am there at my expense.
- Tell you about TurboExpo virtue June 7 - 10 ( attended said events from 2014 on ) and the WPC 23 covering as a media again a World Petroleum Congress WPC Houston that is happening December 5-9, 2021. I spent more than a year in Houston
- Talk intellectual properties. I have 11 patents.
- Investment input I am a registered rep ( stock broker ) with +20 years near NYSE ( mostly as an engineer ) !
- See you at a technical event.
- Hear input on my new [lenandersen.com](http://lenandersen.com) suppressing impersonation ! My current focus is fuel saving , pollution reduction in boilers , internal combustion engines and new combine cycle gas turbine tech !

I have three patents with plus 5% fuel saving with boilers , internal combustion engines and 12 - 35% fuel saving with gas turbines electrical generation and aircraft use. The basis of such is covered in US Patents 8,671,696 , 9,376,933 and Ap 201/ 17/233,993 FILED April 17<sup>th</sup>, 2021. 70306843 "METHOD AND APPARATUS FOR INCREASING USEFUL ENERGY/THRUST OF A GAS TURBINE ENGINE BY ONE OR MORE ROTATING FLUID MOVING (AGITATOR) PIECES DUE TO FORMATION OF A DEFINED STEAM REGION" currently being examined by the USPTO.

Hope to all is well and look forward to hearing from you.

Sincerely --- Len Andersen
